Sustainable Design

The dialogue between style, innovation and environmental sustainability continually inspires fresh design ideas. Innovation has given us the exquisite Dolcevita collection, celebrating the natural elegance of the world-famous Italian lifestyle. The exclusive Dolcevita collection, inspired by the Murano glass-making tradition, offers a unique assortment of bright colours and is produced in bio-based plastic, a modern, organic material made from plant waste.

The Riviera '63 thermal pitcher is rooted in our history. A new addition to the Icons collection, it is designed in homage to the timeless style of the pitcher of the same name created by Giovanni and Raimondo Guzzini in 1963. For breakfast, the range features Everyday, the latest set of espresso coffee cups, mugs and breakfast cups that combines the elegance of porcelain with the brio of coloured plastic, ideal for all occasions. Fiber, on the other hand, is the new entry in the Placemats line, with a soft "feel" and convenient, space-saving flexibility. Sustainability becomes more colourful than ever before in the new Store&More-Bio fridge, freezer and microwave containers produced in bio-based plastic. Last but not least, the OnTheGo collection is extended to include the innovative durable, airtight, shatterproof Coffee&Go espresso coffee cup, a real sustainable alternative to disposable cups.

Putting the environment first, always

Fratelli Guzzini has a long-standing industrial culture founded in environmental sustainability, with a production approach based on green innovations, the protection of resources and respect for people. We have chosen this path because we know that sustainable actions generate wellbeing for the community and the land around us.

We see the environment as all-important: we were the first to choose to use recycled plastic in items for the table, including for contact with foods, but being first is not enough - there is always more to be done. We believe it is a responsible choice and the circular economy ranks with the other core values of Fratelli Guzzini. It is thanks to the synergy of technology, know-how, Italian manufacturing expertise and quality that we are able to stick to our path, with projects grounded in a scientific method, partnering research centres and universities and the design world and participating in joint platforms on sustainable manufacturing.

With the aid of this network, we produce durable, recyclable circular collections, using raw materials sourced from the recovery of plastic packaging or biomass waste.

There are still many challenges, but we want to face them with you. We prioritise the ability to engage with people to understand their needs, not just to find solutions but also to share ideals.

We design and produce positive objects, which spread Italian culture throughout the world and offer a different, more ethical and transparent home and leisure lifestyle.

Benefit Corporation

Fratelli Guzzini is a Benefit Corporation. We have chosen the common good by committing to act in a responsible, sustainable and transparent way in relation to people and the environment.

A genuine undertaking, added to our company bylaws, because we are convinced that generating social value is just as important as achieving economic results.

We have always defended these principles, so we have acted to ensure that the social and environmental goals we set are complied with as part of a strategic plan for sustainability, with targeted projects and activities, monitored and reported every year in an Impact Report to audit the results achieved.

The goals we have set ourselves range from reducing our products' lifecycle environmental footprint with the aid of innovative circular economy solutions that encourage the responsible use of resources, to promoting the intrinsic values of Italian manufacturing by creating attractive, functional, durable products.

As a Benefit Corporation, Fratelli Guzzini belongs to a network of more than 500 Italian companies. However, for us being a Benefit Corporation is the outcome of a commitment towards our partners, communities, the environment and, above all, you. Progress, constant although in small steps, in the direction of research, innovation and a new business method, without forgetting the satisfaction of "a job well done" with which it all began - more than 110 years ago - with the birth of Fratelli Guzzini.

RIVIERA '63

“Riviera '63” celebrates the timeless design of the pitcher of the same name created by Giovanni and Raimondo Guzzini in 1963. Even back in the 1960s they were already pursuing ground-breaking design work in the development of coordinated, innovative, useful products.

A young man and woman are sitting at a wooden table, smiling and talking. The man is holding a small piece of food. The table is set with various breakfast items: coffee cups, a glass of milk, a bowl of fruit, a bowl of cereal, and a green thermal container. The background is a modern kitchen with a large window.
